Summary

AI and automation engineer who builds and runs production systems end to end, across LLM-powered workflows, AWS infrastructure, CI/CD, and data pipelines. Independent consultant since 2025, currently building compliance and reporting platforms on AWS for a multi-shop commercial truck-repair company, and supporting enterprise healthcare infrastructure at Cognizant.

Technical Skills

- **AI Engineering:** Anthropic Claude API (tool use, vision, OCR), prompt design and evaluation, output grading, model routing, production LLM workflow automation, MCP servers
- **Cloud & DevOps:** AWS (Lambda, ECS Fargate, RDS, S3, API Gateway, EventBridge, SES, IAM), Docker, GitHub Actions CI/CD, drift detection and safe-deploy tooling
- **Languages & Data:** Python, JavaScript/TypeScript, SQL (T-SQL), Node.js, React, Google Apps Script, PHP, SQL Server on RDS, MySQL, REST API design
- **Security & Reliability:** API authentication (JWT, OTP), least-privilege IAM, SQL injection remediation, credential rotation, incident triage, runbooks, SLA compliance

Professional Experience

Independent Consulting — Nexus Code **Jun 2025 – Present**
Founder & Sole Engineer *Denver, CO*

- Deliver AI, automation, and cloud engineering on contract; 5.0-rated on Upwork (Rising Talent) and Freelancer.com.

Iron Buffalo Holdings *(multi-shop heavy-truck repair and fleet services)* *Jun 2026 – Present*

- Build and operate 30+ production systems (2,400+ merged PRs since Jul 2026) for revenue reporting, compliance, commissions, and customer portals on AWS Lambda, SQL Server (RDS), Apps Script, and S3.
- Delivered DOT annual (49 CFR 396.17) and preventive-maintenance inspection platforms: offline-capable forms, countersignatures, dispatch queues, and randomized integrity checks that catch inspections signed off without being performed.
- Integrated the Claude API into production workflows for invoice auditing, service-request classification, handwritten-note OCR, and twice-daily AI-written operations briefings. Built a read-only MCP server (45 entities, ECS Fargate) that lets the team query the production database in natural language.
- Shipped an externally authenticated customer portal (email-OTP login, JWT sessions) serving fleet-readiness and spend KPIs to the client's largest national fleet account.
- Established GitHub Actions CI/CD with deploy gates that harvest out-of-band production edits into pull requests instead of overwriting them, plus nine scheduled detectors for drift, unshipped merges, and stalled jobs.
- Hardened the public API surface: closed a read-path SQL write bypass, enforced table whitelisting, converted fail-open defaults to fail-closed, and authored the credential-rotation runbook.

Cognizant / TriZetto **Apr 2026 – Present**
Infrastructure Support Engineer *Englewood, CO*

- Support enterprise healthcare infrastructure across multi-server Windows and Linux environments to strict SLAs.
- Perform incident triage, root-cause analysis, and resolution; monitor server health and automate alerting with DevOps.
- Train and evaluate an internal chatbot on company data: dataset preparation, output grading, and prompt refinement.

edX **Jan 2023 – Oct 2025**
Full Stack Teaching Assistant *Remote*

- Mentored 200+ students in full-stack web development, software architecture, systematic debugging, and Git.

PowerSchool Group LLC **Apr 2021 – Jan 2023**
Technical Resource Specialist *Remote*

- Provided technical support for enterprise SaaS platforms, automated operational workflows with PHP and cron, and executed release testing for platform updates.

Education & Certifications

Western Governors University — B.S., Software Engineering Dec 2024
Columbia University — Engineering Boot Camp (Full Stack) Nov 2022

Certifications: AWS Cloud Practitioner | Azure Fundamentals | CompTIA Security+ | CompTIA Project+
